**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

As for **claim 1** the prior art does not teach or fairly suggest the use of a digital camera comprising a photographing component for photographing a subject, a setting component for setting whether a generation of an intermediate image is to be carried out, and for setting a resolution of an original image, so that if the generation of the intermediate image is to be carried out, the setting component sets a resolution of the intermediate image based on a set resolution of the original image, an intermediate image generating component for generating, when the intermediate image generation is set by the setting component, the intermediate image for verifying a state of focus, having the resolution which is between a resolution of the original image and a resolution of a thumbnail image, and a storage component for storing an original image photographed by the photographing component and, if generated, the generated intermediate image wherein, when the set resolution of the original image is changed to a new set resolution, the setting component automatically changes the resolution of the intermediate image based on the new set resolution of the original image.

As for **claim 8** the prior art does not teach or fairly suggest the use of a photographing system comprising a digital camera, and a machine-readable medium encoded with a set of medium-readable instructions for use on a personal computer, wherein the digital camera includes a photographing component for photographing a

subject, a setting component for setting whether a generation of an intermediate image is to be carried out, and for setting a resolution of an original image, so that if the generation of the intermediate image is to be carried out, the setting component sets a resolution of the intermediate image based on a set resolution of the original image, an intermediate image generating component for generating, when intermediate image generation is set by the setting component, the intermediate image, to verify a state of focus, having the resolution between a resolution of the original image and a resolution of a thumbnail image, a storage component for storing an original image photographed by the photographing component and the generated intermediate image, a communicating component for communicating with the personal computer, wherein the personal computer is used to set the setting component via the communicating component, and wherein, when the set resolution of the original image is changed to a new set resolution, the setting component automatically changes the resolution of the intermediate image based on the new set resolution of the original image.

As for **claim 14** the prior art does not teach or fairly suggest the use of a method for photographing with a digital camera, the method comprising photographing a subject using a CCD (specification: page 12, lines 4-13), determining whether or not a generation of an intermediate image is set to be carried out, setting a resolution of an original image, so that if the generation of the intermediate image is to be carried out, setting a resolution of the intermediate image based on a set resolution of the original image, generating the intermediate image for verifying a state of focus, having the resolution between a resolution of the original image and a resolution of a thumbnail

image when the intermediate image generation is set, storing the photographed original image and, if generated, the generated intermediate image, and wherein, when the set resolution of the original image is changed to a new set resolution, the resolution of the intermediate image is automatically changed based on the new set resolution of the original image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
